PROFESSIONAL SUMMARY

Software Engineer with 2+ years experience in full-stack development, maintenance, and optimization of enterprise applications. Expert in MERN stack, Java Spring Boot, Python, and cloud technologies. Proven ability to apply scientific methods to solve complex problems, optimize performance by 40%, and collaborate effectively in Agile teams. Strong technical communicator with experience supervising teams and working independently with minimal supervision.

TECHNICAL SKILLS

Languages: JavaScript, Java, Python, TypeScript, C++, HTML5, CSS3, SQL, PHP
Frontend: React.js, Redux, Next.js, Angular, Bootstrap, Tailwind CSS, Responsive Design
Backend: Node.js, Express.js, Spring Boot, FastAPI, RESTful APIs, Microservices
Databases: PostgreSQL, MongoDB, MySQL, SQLite, Redis, Query Optimization
Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, Git, CI/CD, Jenkins, Linux
AI/ML: TensorFlow, Scikit-learn, Pandas, NumPy, Data Pipelines
Practices: Agile/Scrum, Code Reviews, Design Patterns, Testing, Problem Solving

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer

January 2023 – December 2023

MCR Web Solutions

Bhimavaram, Andhra Pradesh

- Engineered enterprise applications using MERN stack and Spring Boot serving 2,000+ users with 99.5% uptime through robust error handling and monitoring systems
- Optimized performance by 40% and reduced API response time by 60% through code analysis, database query optimization, indexing, and implementing Redis caching
- Architected scalable RESTful APIs with JWT authentication, role-based access control, and comprehensive logging for production environments
- Designed PostgreSQL and MongoDB schemas handling 10,000+ daily transactions with optimized queries and proper indexing
- Collaborated in Agile teams with daily standups, sprint planning, code reviews, and technical design discussions to deliver features on schedule
- Supervised 4 junior developers, conducted code reviews, established standards, and ensured adherence to software engineering best practices

EDUCATION

Bachelor of Technology - Computer Science & Design

Expected May 2026

Sagi Ramakrishnam Raju Engineering College

CGPA: 7.93/10

Diploma - Artificial Intelligence & Computer Science

June 2023

ISTS Women's Engineering College

CGPA: 9.5/10

KEY PROJECTS

Enterprise Resource Planning System | *Java Spring Boot, MySQL, Angular, Docker*

2024

- Architected modular ERP with microservices for inventory, HR, and finance modules serving enterprise workflows with scalable design
- Implemented secure APIs with JWT authentication, RBAC, and MySQL achieving 99% uptime handling 10,000+ daily transactions
- Containerized services using Docker and deployed on AWS EC2 with load balancing for high availability

Cybersecurity Risk Intelligence Platform | *Python, FastAPI, PostgreSQL, ML, React.js*

2025

- Built platform with FastAPI backend processing 100+ req/sec with real-time threat detection and React.js dashboard
- Developed ML pipeline using Random Forest achieving 92% accuracy in network anomaly detection with automated preprocessing
- Designed PostgreSQL schema with optimized indexing enabling sub-second query response times for threat intelligence

TechWave AI Learning Management System | *MERN Stack, JWT, WebSockets, Docker*

2024

- Developed LMS with AI chatbot supporting 500+ concurrent users with real-time messaging using WebSockets
- Built RESTful APIs with Express.js, JWT authentication, and MongoDB aggregation reducing response time by 35%
- Containerized and deployed on AWS with auto-scaling achieving 99.8% uptime and seamless deployments

RaidOn Transportation Platform | *PHP, MySQL, JavaScript, Google Maps API*

2025

- Created ride-sharing solution with dynamic booking, route optimization, and real-time GPS tracking for 200+ daily bookings
- Integrated Google Maps API, payment gateway, and SMS notifications with responsive mobile-first design

ACHIEVEMENTS & CERTIFICATIONS

Certifications: JavaScript Advanced (Sololearn), Problem Solving Expert (HackerRank), DSA Certification

Hackathons: Smart India Hackathon 2024, College Technical Fest Winner 2023

Leadership: Led team of 4 developers, mentored 5+ juniors, organized coding workshops

Open Source: 15+ GitHub repositories, 50+ commits, contributed to 3 open-source projects
